Preface

List of Authors and Coauthors

Design Overview of an Asteroid Sample Return Capsule	1
<i>Yoshifumi Inatani and Nobuaki Ishii</i>	

High Enthalpy Flow Simulation with Ablation

Overview of Research for Prediction of Aerodynamic Heating Environment during a Super-Orbital Reentry Flight of MUSES-C Reentry Capsule	19
<i>Takashi Abe</i>	

Chemical Nonequilibrium Viscous Shock-Layer Analysis over Ablating Surface of Superorbital Re-Entry Capsule	23
<i>Kojiro Suzuki, Kazuhisa Fujita and Takashi Abe</i>	

A Thermochemical Nonequilibrium Flow around a Super Orbital Reentry Capsule with Ablation	43
<i>Ryouji Doihara and Michio Nishida</i>	

Influences of Transport Model on Heating Rate of Reentry Vehicles	53
<i>Hiroataka Otsu, Kazuhisa Fujita and Takashi Abe</i>	

Radiation Heating Analysis

Development of a Radiation Analysis Code for Hypervelocity Reentry Applications	69
<i>Kazuhisa Fujita and Takashi Abe</i>	

Viscous Shock Layer Studies of a Super Orbital Reentry Capsule Using a Multi Vibrational Temperature Model	83
<i>Ryouji Doihara and Michio Nishida</i>	

Assessment of Forebody and Backbody Radiative Heating Rate of Hypervelocity Reentry Capsule	93
<i>Hiroataka Otsu, Kojiro Suzuki, Kazuhisa Fujita and Takashi Abe</i>	

Boundary Layer Transition

Theoretical Consideration on Laminar-To-Turbulent Transitions over an Ablating Reentry Capsule	109
<i>Kimiya Komurasaki and Graham V. Candler</i>	

Anomalous Heating Profile over Entry Capsule with Ablation and Its Relation to Earlier Turbulent Transition	123
---	-----

Keisuke Sawada

- An Experimental Study on the Boundary Layer Transition due to Gas Injection from Capsule-shape Body Surface 133

Tetsuya Yamada, Hiroyuki Ogawa, Satoshi Nonaka, Yoshifumi Inatani, Kazuyuki Nakakita and Takashi Yamazaki

Hypersonic Ground-Based Experimentation and Test Technique

- Arc Heating Facility and Test Technique for Planetary Entry Missions 147

Tetsuya Yamada and Yoshifumi Inatani

- Utilization of Expansion Tube for MUSES-C Reentry Simulation 165

Akihiro Sasoh, Hirotaka Otsu, Takashi Abe, Keisuke Sawada and Hiroyasu Mizuno

- Experimental Study of Nonequilibrium Phenomena behind Shock Waves Generated in Super-orbital Reentry Flight 177

Takashi Abe, Atsushi Matsuda, Kazuhisa Fujita and Shunichi Sato

- Pressure- and Temperature-Sensitive Paint Measurements in Shock Tunnel 191

Yoshiaki Nakamura and Mitsuru Kurita

Ablative Thermal Protection, Thermal Response Characterization, and Integrated Simulation Technique

- Thermal Responses of Ablator for Reentry Capsules with Superorbital Velocity 201

Tetsuya Yamada, Yoshifumi Inatani and Ken'ichi Hirai

- Trajectory-based Coupled Analysis of Viscous Shock Layer and Charring Material Ablation at Stagnation Point 217

Kojiro Suzuki

- An Integrated Numerical Method for Predicting Aerodynamic Heating Environment for MUSES-C Entry Capsule with Ablation 233

Keisuke Sawada

- Thermal Protection System of the Reentry Capsule with Superorbital Velocity 245

Tetsuya Yamada, Nobuaki Ishii, Yoshifumi Inatani and Masahisa Honda

Aerodynamics of Reentry Capsule

- Transonic Dynamic Instability of disk-shaped Capsule 265

Koju Hiraki

- Numerical Analysis of Dynamic Instability at Transonic Speeds 275

Susumu Teramoto, Kozo Fujii and Koju Hiraki

- Study for Dynamically Unstable Motion of Reentry Capsule 301

Takashi Abe, Syunichi Sato, Yutaka Matsukawa, Kazushi Yamamoto and Kazumi Hiraoka

Rarefied Aerodynamics of MUSES-C Sample Reentry Capsule	333
<i>Kazuhisa Fujita, Yoshifumi Inatani Koju Hiraki and Takashi Abe</i>	
The Aerodynamic Database for Asteroid Sample Return Capsule	345
<i>Koju Hiraki and Yoshifumi Inatani</i>	
Capsule System Analysis and Reentry Flight Scenario	
A Unique Single Stage Parachute System and Qualification by Balloon Drop Tests	367
<i>Nobuaki Ishii, Koju Hiraki, Yoshifumi Inatani, and Masahisa Honda</i>	
Attitude Motion and Aerodynamic Characteristics of MUSES-C Reentry Capsule	379
<i>Nobuaki Ishii, Koju Hiraki and Yoshifumi Inatani</i>	
System Description and Reentry Operation Scenario of MUSES-C Reentry Capsule	389
<i>Nobuaki Ishii, Koju Hiraki, Tetsuya Yamada, Yoshifumi Inatani, and Masahisa Honda</i>
